webeyecms with Dahua technology

Simple process to get advanced alarm monitoring

webeyecms is an intelligent VSaaS platform that takes the hassle out of managing alarms. For a small monthly fee, it brings all of your video alarm traffic into one easy to use interface then acts as a virtual central monitoring solution to receive and manage all of your video alarms. It includes video analytics to verify genuine intrusions, cloud storage and a system health check to make sure all your security systems are working correctly. No other platform has gone further to make sure you receive video alarms, and we meet the stringent ISO 9001, 27001, 27017 and 27018 global quality standards for safe and robust alarm delivery.

webeyecms integrates with Dahua's core video product range, including:

- I.P. cameras
- TiOC range
- Thermal imaging cameras
- Network systems
- PTZ range with full remote control within the webeyecms platform.

Alerts and video

View webeyecms from wherever you are either directly in your browser or download the app

The world's fastest response

Once triggered, a notification reaches you almost immediately

Powerful management tool

Monitor the health and status of all of your video security accounts in one powerful, easy to use dashboard

Cloud storage

All events are stored, and video can be viewed for two years or four years if required for evidential purposes

Monitoring 24/7, 365 days a year

We've fully automated the alarm receipt, alarm handling and alerting process. We're inherently efficient and reliable

Full audit trail and health check

You can easily view your alarm history, and the reporting dashboard will tell you the status of your system even down to which camera(s) is not working

100% reliability and scalability

webeyecms performs equally well for any size of business from small security firms to multi-national corporations

Generates recurring revenue

Offer webeyecms as a monitoring service for your customers and get a monthly income from your existing Dahua CCTV
